

OTTAWA 2023

64TH WORLD STATISTICS CONGRESS

Session 96

Computational competencies of the modern statistician

Mark P.J. van der Loo
Statistics Netherlands
17 July 17:00

“It is increasingly clear that computing is [...] an essential skill for statisticians [...].”

Nolan and Temple Lang (2010)

“Computing is as important as mathematics in both statistical practice and research [...].”

Nolan and Temple Lang (2010)

Nolan D, Temple Lang D. [Integrating computing and data technologies into the statistics curricula](#). in: Proceedings of the Eighth International Conference on Teaching Statistics; 2010. pp. 1-6.

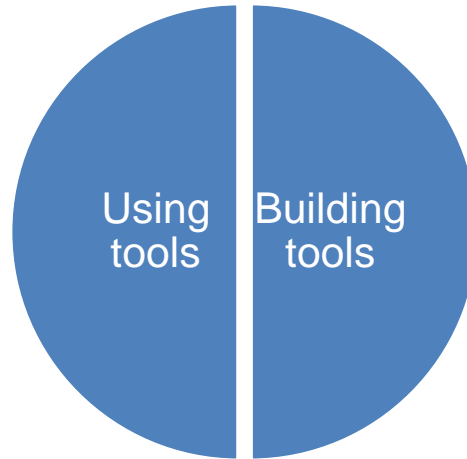

Computing in the statistical office

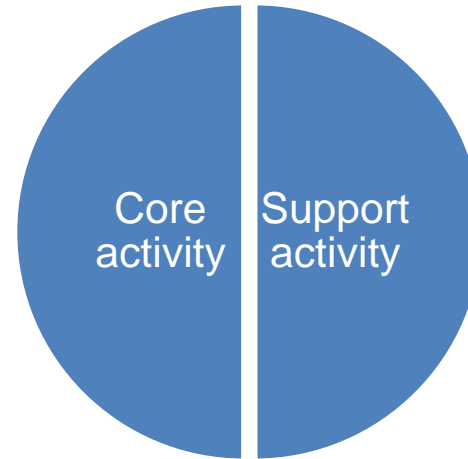

Why

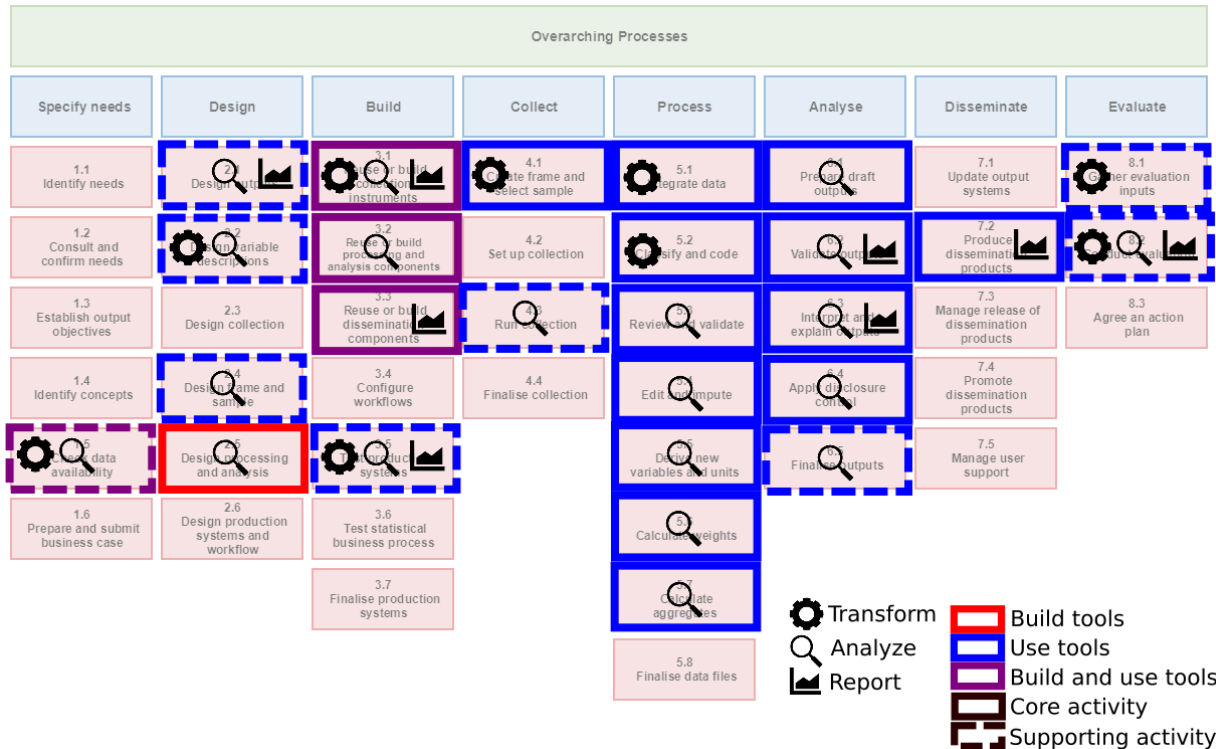

What

Where

Computing with data

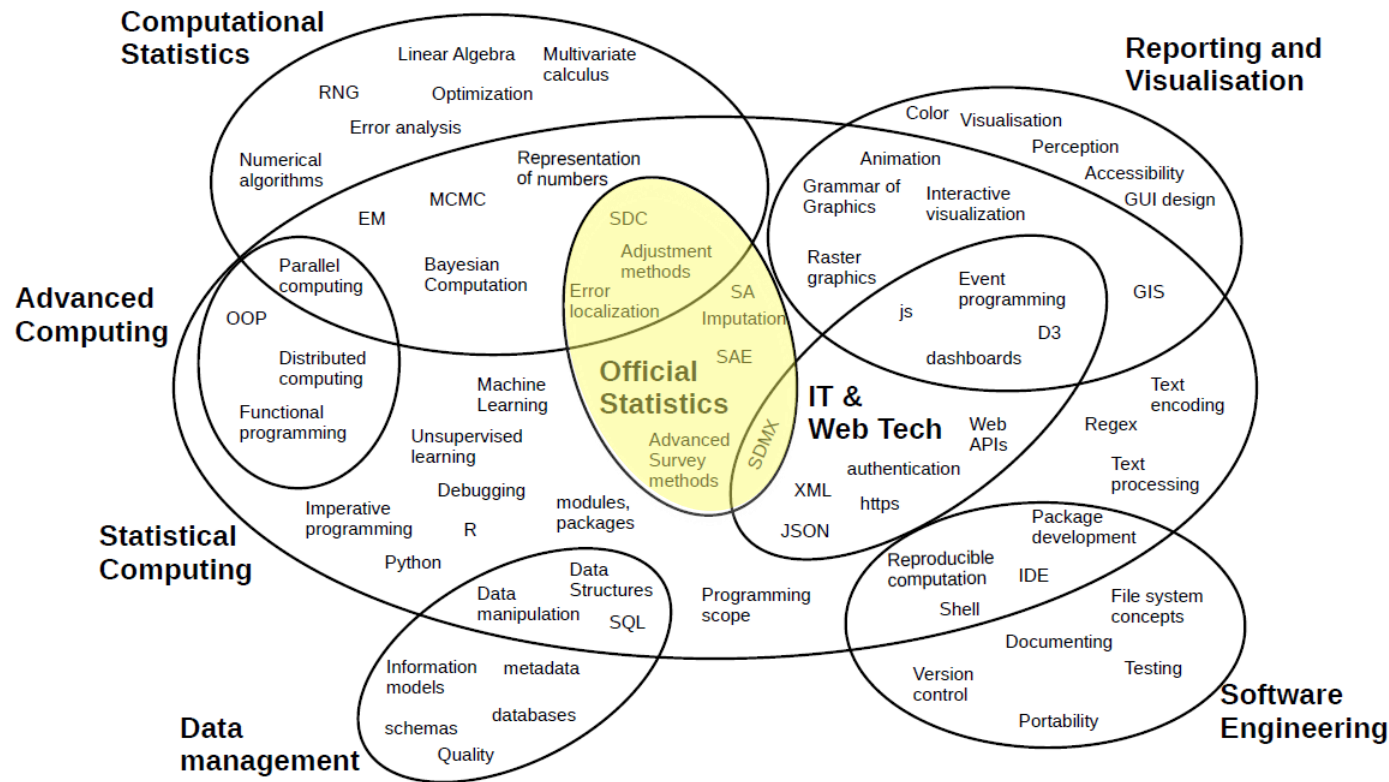

Van der Loo, MPJ (2021)
[Computing in the Statistical Office](#).
 Statistical Journal of the IAOS 37
 (2021) 1023–1036

Trends in official statistics community

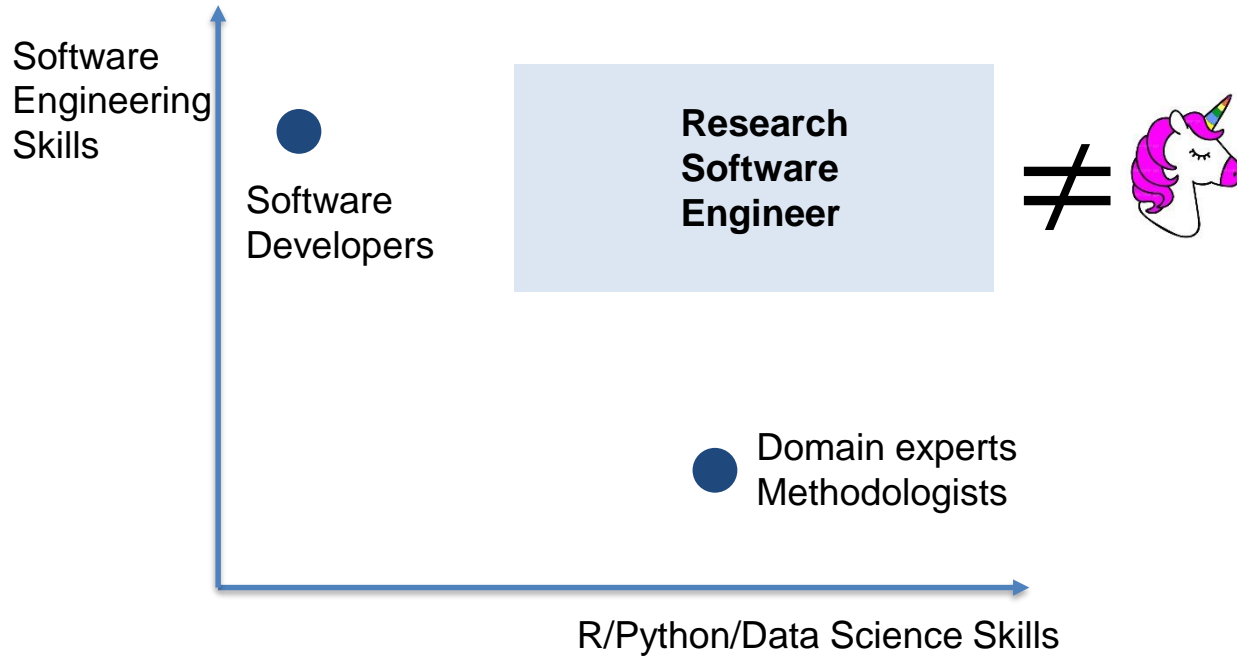

- More standardization
- More flexibility/agility
- More tailormade statistics
- More automation
- More separation of content from code
- More output / experimental statistics
- More data sources
- ...

Topics for computing in official statistics

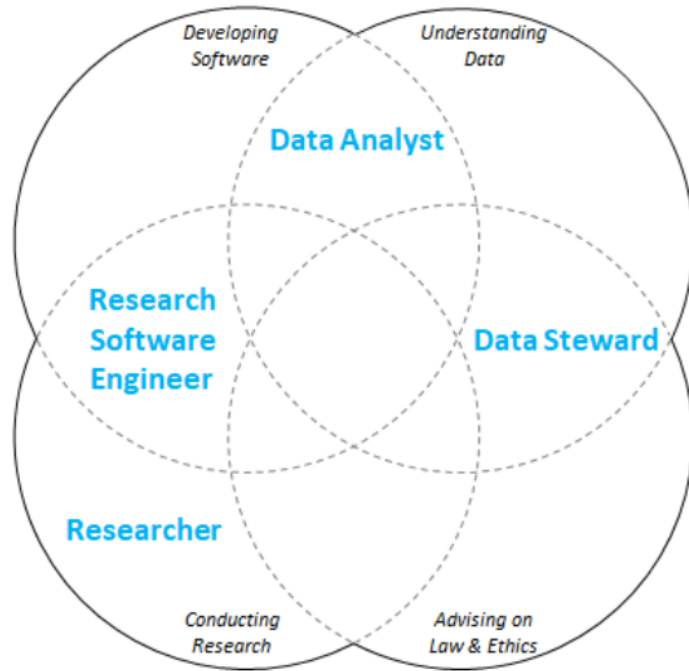

Adapted from: Nolan D, Temple Lang D. (2010) *Proc. of the 8th International Conference on Teaching Statistics* 1-6.

Areas of expertise

The Research Software Engineer

An **RSE** is responsible for **software engineering** based on an **understanding of the research goals**

A **data analyst** is responsible for **conducting analysis** on the data based on an **understanding of software**

Barker M, Dumolyn B, van Nieuwerburgh I, Castle D, Arenas M, Repanas K, et al. [Building digital workforce capacity and skills for data-intensive science](#). (OECD); 2020

The Rise of the Research Software Engineer

Research software is fundamental to today's research, yet it does not receive the recognition it deserves.

Akhmerov et al. (2019)

Research Software Engineers International

researchsoftware.org

RSE associations:
BE, DE, NL, Nordic
Countries, AUS+NZ, UK,
US, DK, *Asia*

Akhmerov A, Cruz M, Drost N, Hof C, Knapen T, Kuzak M, et al. (2019) [Raising the profile of research software: Recommendations for funding agencies and research institutions](#). Tech. Rep., Netherlands eScience Center, Amsterdam, the Netherlands.

Summary / Discussion

- Computing with data pervades the statistical office (it always has)
- There is a gap between IT and Methodologist/Domain experts (there always was)
- The role of Research Software Engineer (who is *not* a unicorn) fills this space.

More on skills and competences? Join my talk in IPS 331 Tue 16:00-17:25
